## DIGITAL TACHOMETER

### The difference measuring RPM

- It is used the microcomputer (CPU) technique and junction laser technique for one instrument combine:
  - IN09234: Photo tach (RPM) & Tot
  - IN09236: Photo tach (RPM) & Contact tach (RPM, m/min)
- Wide measuring range and High resolution
- Low battery voltage indication
- The instrument is delicated and rugged
- It uses the durable - long-lasting components and a strong, light weight ABS plastic housing
- It's design has been carefully shaped to fit comfortably in either hands
- Memory / call button operation (max, min and last value)

### Only IN09236

- Contact part and photo part can be switched value at anny time
- New surface speed sensor with flute vails to measure speed and leght of wire cable and rope conveniently
